Thirty30 Tennis - Where EVERY Point REALLY Counts
Group A (4 players)

|  | A | B | C | D | Wins | \% of Games Won <br> (Divide games won by total <br> games played $\times 100)$ | Position |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| A |  | 2 | $5(7)$ | 1 | 1 | $(8 / 20 \times 100)=40 \%$ |  |
| B | 4 |  | 1 | 4 | 2 | $(9 / 17 \times 100)=53 \%$ | $4^{\text {th }}$ |
| C | $4(3)$ | 4 |  | 4 | 2 | $(12 / 20 \times 100)=60 \%$ | $2^{\text {nd }}$ |
| D | 4 | 2 | 2 |  | 1 | $(8 / 17 \times 100)=47 \%$ | $1^{\text {st }}$ |

The winner here is C . Because B and C were tied on wins, the organiser calculated the $\%$ of their games each player had won. C had won $60 \%$ of their games but B had only won $53 \%$ so B came in $2^{\text {nd }}$.

| Round Robin -5 players |  | Group |  |
| :---: | :--- | :---: | :---: |
| Player A |  | Venue |  |
| Player B |  | Surface |  |
| Player C |  | Date |  |
| Player D |  |  |  |
| Player E |  |  |  |

|  | A | B | C | D | E | Wins | \% of Games Won <br> (Divide games won by total games played $\times 100$ ) | Position |
